PROFESSIONAL SUMMARY

BCA student with strong interest in Frontend Development and Python Web Development Experienced in building responsive web applications using HTML, CSS, JavaScript, and Git. Passionate about creating user-friendly interfaces and continuously learning modern technologies.

SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), Python, C

Frameworks: Flask, Bootstrap

Technical Skills: Git, GitHub, VS Code, Chrome DevTools, Responsive Web Design, API Integration

Cloud Technologies: AWS EC2, AWS S3, Render

PROJECTS

- **Rajraushan Portfolio**  **jan – Present**
Html, Css, JavaScript
 - Designed and developed a modern and fully responsive personal portfolio website using HTML, CSS, and JavaScript. The portfolio effectively showcases my projects, technical skills, Certificates, Content and achievements in a clean and user-friendly interface. Focused on creating an engaging user experience with smooth navigation, structured layout, and visually appealing design. Implemented responsive design techniques to ensure compatibility across different devices and screen sizes.
 - Additionally, optimized the website for better performance and accessibility, making it easy for users and recruiters to explore my work. The project reflects my front-end development skills, creativity, and ability to build real-world web applications.
- **Raj Vacancy Portal**  **Feb – May 2026**
Python (Flask), HTML, CSS, JavaScript
 - Developed a full-stack job vacancy portal to simplify job posting and searching. The platform provides an intuitive interface for users to explore and manage job opportunities.
Implemented backend functionality using Flask (Python) for routing and application logic while designing responsive user interfaces with HTML, CSS, and JavaScript. Managed application data using JSON and maintained a structured architecture with templates and static files. Successfully deployed the application on Render, making it publicly accessible.
- **Online-Quiz**  **Jan – Mar 2026**
Html, Css, JavaScript
 - Developed a dynamic and user-friendly online course platform using HTML, CSS, and JavaScript. The project is designed to provide an interactive learning experience by allowing users to explore courses, view content, and navigate through different sections seamlessly. Focused on creating a clean and responsive user interface to ensure accessibility across various devices, including mobile and desktop. Implemented structured layouts, intuitive navigation, and engaging design elements to enhance user experience.
 - The platform demonstrates strong front-end development skills, including responsive design, layout structuring, and user interaction handling.
 - Key Features: Responsive and mobile-friendly design Interactive course browsing interface Clean and modern UI/UX design Smooth navigation and structured layout Organized content presentation

EDUCATION

- **Bachelor of Computer Applications (DS & AI)** **Aug 2024 – May 2027**
Gopal Narayan Singh University, Jamuhar
- **Higher Secondary School (12th)** **Mar 2022 – Feb 2024**
R.L.S.Y.College, Aurangabad

CERTIFICATES

- **Predictive Analytics using IBM SPSS Modeler - Foundations Course**  — IBM.
- **Front End Technologies – IBM Career Education Program**  — Issued by IBMCEP (CognitiveClass.ai)
- **R Programming for Beginners: Geeting Started**  — Infosys | Springboard
